

## INVITATION HPBB2020

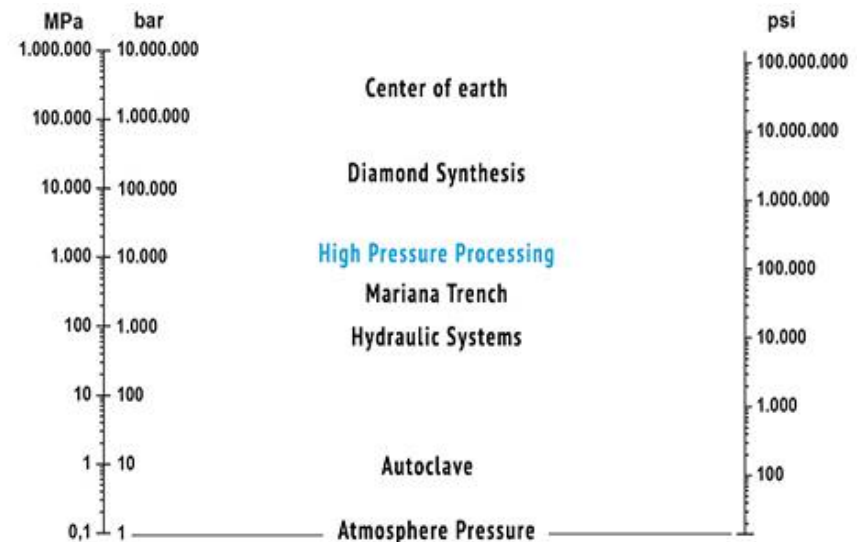

The technology battle: heat treated vs pressure treated eggs

High Pressure Bioscience and Biotechnology addresses the elucidation of effects, mechanistic understanding and knowledge-based exploitation of high pressure induced changes in various biological systems.

## INVITATION HPBB2020: 7-10 July 2020

It is with great pleasure that we invite you to the conference on High Pressure Bioscience and Biotechnology

# HPBB2020 in Denmark

The University of Copenhagen is hosting the 11<sup>th</sup> International Conference on High Pressure Bioscience and Biotechnology (HPBB2020)

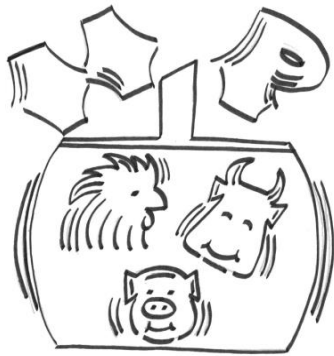

## Department of Food Science

The department covers all disciplines of food science in the chain from raw materials to processing and consumption. The department leads internationally in a number of research areas and has strong ties to the food industry.

## Founded on basic research and applied research

Research at the Department of Food Science is based on strong basic research and on application-oriented research both contributing to growth and employment and to solving society's problems. The department's food education programmes offers strong vocational and internationally recognized skills.

# Programme and venue

The conference will bring together scientists, students and professionals to maximise the application of high pressure technology and to learn about exciting research in high pressure bioscience and biotechnology.

## Programme

HPBB2020 will provide an opportunity for presenting research relevant to applications of high pressure across the HP subspecialties: food science, biochemistry & biophysics, microbiology & cell biology, medicine & pharmacology, analytical technologies & experimental systems and deep sea.

The programme embraces the overall themes with 12 sessions covering the HP subspecialties:

- Food
- Macromolecules and biotechnology
- Marine science

## Venue

HPBB2020 will be held in the greatest little kingdom, Denmark. Though small in size, Denmark is among the best research nations in the world. The University of Copenhagen is the largest university in Denmark and the oldest in northern Europe. Copenhagen offers easy accessibility for international travellers, a low crime rate, efficient transport infrastructure, safety, cleanliness and world-class hotels and restaurants.

**We look forward to welcoming you in Copenhagen 7-10 July 2020.**
